# HOPELESS TO TRY TO CURB THE CITY'S GROWTH BY LAW

### Congestion Problem Is Not to Be Solved Merely by Cutting Off Skyscraper Building

This is the first of a series of three articles that discuss New York's congestion problem. The second article will appear in next Sunday's SUN. It will discuss a number of proposed solutions of the problems of city growth and congestion. The third and last article will give the details of an immediate solution of the most urgent congestion problem, that of relocating New York's garment industries. The plan proposed is believed by its supporters to be adequate, feasible and efficient and pregnant with suggestions for the future housing of the varied manufacturing and residential populations that must cluster about the world's greatest trading centre.

#### By MILO HASTINGS.

luck, but a wagonload of horseshoes is junk." Likewise one Woclworth Building is a thing of beauty, a city's But Manhattan Island is a body of

stepped on to allow Mr. Woolworth to

Only ten years ago the twin flagpoles of the Park Row Building. breaking through the ragged skyline building in the world. Shooting up like mushrooms in the nights of those brief years came our fairyland of towers. and we held our breath and wondered where would be the next. And now, ten years a New Yorker, we go down to meet the incoming Western cousin at a Jersey ferry, and, pointing out the old Park Row towers midheight in a carnival of architecture, we claim all above their level as our very own and Walla Walla? New York and feel metropolitan in-

It is our Manhattan; and as one digs into the ashes of Pompeli to learn of the past, so we gazed into New York's filmy sky to learn of the future. We did not say, "See, it is finished," but blinked wonderingly at the gold trimmed tower flashing in the sootless sunlight, read of the strength of steel short of a hundred stories, and awaited the super-Woolworth.

topped the steel are now tumbled to thereby certain increase of rentals; swish fine goods are not deplayed and the commonplaceness of legalized but all his neighbors lose on his acheight mediocrity and hopeless uni-

by the wet blanket of the law. this wonderful decade, was lavished on the skyline. There was the mystery of an unexplored cave, the fascination of secret passages, as we dived down the tile walled stairways and stood beexpress, till, shooting beneath streets od parks and rivers we came out high and dry on a steel stilted viaduct atop

the houses of another city.

There is nothing that gives one so keen a sense of the future laughing at the past as a map of New York with the subways printed in blue and the for in New York when a man walks abroad his echoing footsteps tell him that he treads on hollow ground, and from out the depths comes the chugthug of the rock drill, the quaking om of the electrically shot blast beneath its planket of woven rope, the muffled beat of air pumps as they drive their mole-blind shields beneath the silt of harbor-digging, tunnelling, sel the Calamares, a 10,000 ton ship way we could have towed her into boring, mining and excavating; a and largest of the United Fruit Com- Havana and picked up a very neat never ending rebuilding of an eternally pany's fleet, had been standing by the sum," said one of the officers. "As it unfinished city; a ceaseless catacomb- Ninfa for several hours. • was we had to keep on because of our ing of our restless Rome-not for canonized bones, but for the rush and roat

low wagons frightening milady's with a large number of passengers with a valuable cargo, brancing carriage horses off the ave-In this, too, we gloried and we watched the gaps fill up, till a slow moving endless procession might have told a visiting Martian that the king of the world had died. Moving, halted semaphores, wriggling on, like a speckled black serpent of traffic worming and sliding along on asphalt greased with the oil of its drippings.

And we cared not for traffic officials or traffic problems, for traffic too was our pride of growth. And so we gloried filling up and overflowing, crowding and quivering like new swarmed bees in a too small hive—and we were of it. Starting at the southern extremity directions for New York to grow—up. down and north. And north it grew by band and belt and stratum till today one can start at Certral Park and, excavating toward the Battery, un-earth more superposed civilizations than when digging downward on the site of Nineveh or Babylon. Church spires are overshadowed by sky-scrapers; the columns of old colonial mansions stand in the rear of downtown stables, and up town stables are made into restaurants de luxe where one pays a dollar extra to eat in the

So speedy was Manhattan's arch logical shift that one could see the minute hand move. Ten years ago Cooper Union was a resort for hoboes and Fourteenth street was already looking shabby. Twenty-third street had its brief day, and by the time the last residence on Thirty-fourth street put in class fronts one would have at night in Union the street and the street had been as a state of the street and the street

the ruins of Brooklyn Bridge. And HE late lamented Elbert Hub-bard's favorite story ended:
"One horseshoe means good "One horseshoe means good "One horseshoe means good "He first sky-

pride, a testimony of mechanical and architectural achievement—and a monument to Mr. Woolworth. But a city full of fifty-five story buildings would be a calamity.

Did Mr. Woolworth have a right to build a fifty-five story building? and if so, why should this right be henceforth denied and similar buildings oe dations of that reservoir the New York

A few blocks to the northeast Few rights are inalienable when too many people wish to exercise them at a little further to the southwest is the one time and place. And there are two other one. In this area, within a mile many people in New York who need radius of the top of Murray Hill, is light and air and their right not to be new the heart and glory of the metropolis.

Within this area are the greatest have many imitators. So we have the hotels, the finest theatres, the most new laws limiting building heights magnificent railroad stations, and the and the "use district" laws telling Can these things be moved? If so, where we may live, where we may where to shall we move them? Or trade, what we may make and where shall they be adulterated, overshadowed and elbowed into obscurity by the mere making of trousers for Chicago and petticoats for New Orleans?

And there is an Applan way where are no crosses hung, and straight as a of Manhattan, marked the tallest race track at Ormond Beach it runs from the oasis of Washington Square till, skirting three miles of Central Park, it sinks into oblivion above the Nineties. It is your Fifth avenue and mine, and the novelists', and thereon we want to walk of Easter Sundays and carry canes. And shall the first ladies of the land as they yawn and look out of the Waldorf windows at 19 A. M. gaze into other windows where for three hours the sewing machine girl has been sewing machine lace on lingerie for the second ladies of Waco

> It is not mere kowtowing to snobthere is a place for everything, and a good many things in New York are getting out of place. And all this mis-

placing and replacing is expensive. stores or stores are vacated because tution guaranteed their right to walk factories move next door there is tremendous cost and waste. economic drive that forces these columns guaranteed not to buckle changes, but there is money lost as well as made, and uncertainty and chaos reign in real estate. A man skirts through crowds of working men waited the super-Woolworth.

But our fancy born castles that outand puts up a ten story loft, gaining shope. And where fine skirts will not

Hardly space for another car, Fifth avenue and Thirtyfifth street.

sense of quality the region soon becomes a wilderness of lofts, and all rents go down, till the daring Samson who tumbled down the temple of values is crushed along with the Canaanites. In such a manner land and rental values on lower Fifth avenue have been cut in half.

And so with the increasing realization that no man buildeth unto himself and the growing consciousness of our future have come our city planners whose dreams are now being crystallized into law. Not being able to build subways fast enough to keep up with the growing daytime housing capacity of the lower seland, they now would stem the tide of congestion by drawing a chalk mark in the air and saying "Thou shalt not cross this deadline on the sky.

And likewise against this unwanted mixing of the wearers and the makers our engineer trained civic servants ar marking off our island and saying black is black and white is white, an l we want no pepper and salt town where the workers and players and the goers and the doese shall be mixed.

But the ways of the law are tedious and cautious altogether, and it disturbs not the mistakes heretafore made. Fifth avenue below Twentythird street is already lost to the glory bery that would make us wish to keep Murray Hill sacred to the elite. But rush hours and from 12 till 2 o'clock of the name, and up as far as Thirtyrush hours and from 12 till 2 o'clock At Fifth avenue and Thirtyone can look upon a sea of faces-en- second street any day at noon. tirely too many faces and very much too much alike.

These workers of the garment When residences are remodelled for trades are under the flag and Constito work; and under the rights of labor It is the they are privileged to take their noon rest in little emoking sidewalk groups before the dors of their workshops. And yet fine ladies will not swish their who smoke their noonings before their

height mediocrity and hopeless uniformity. The solid rock of Manhattan, the half tried possibilities of steel, the unsatiated vanity of builders, all these for selfah gain and their profits have unsatiated vanity of builders, all these for selfah gain and their profits have unsatiated vanity of builders, all these for selfah gain and their profits have unsatiated vanity of builders, all these for selfah gain and their profits have unsatiated vanity of our inimitacle shooting fireworks of skyline are now damped and squashed buildings is profitable at first, as the have moved uptown, and again upaddress seems to give the manufac- town, and uptown yet again, but now nicely dressed ones appointed com-But not all our pride and glory in turers exclusiveness, but when the fac- the uptown is getting scarce and the tory atmosphere has driven out the old guard of commercial and social high priced neighbor that gave that aristocracy is digging trenches for a

last stand and conding out Save New York skirmishing parties to shoo the tailors off the sidewalk and drive the garment workers back into Delances street and Grand.

This battle between the high rental occupants and the loft occupying inwaged below Twenty-third street and I the loft tenants have won have not been content with their widnings south of the Flatiron.

Like little poor girls tagging after little rich girls, the factories have purmittees to explain to the ones who weren't wanted and to ask 'em to go

The history of this warfare between the makers on the one hand and the sellers and buyers on the other r like a tale of children trying to dam back a tide with sand. When the modern steel structure with its better light and air first preempted the lower
